## Good reasons to commit to a three-year services contract

The Service Pack is a set of unique benefits. This three-year loyalty commitment allows you to benefit from services and rates that are particularly attractive and advantageous:

- **The Service Pack is 20% less expensive** than software updates purchased separately.
- **The latest software version is offered.**
- **The latest rendering engine is offered** to contractors who do not yet have it.
- **Lost or stolen key insurance.** The key (*USB dongle*) contains the usage rights needed to operate the software. If this key is lost or stolen, the usage rights are lost along with it.

With this insurance, EDICAD supplies the user with a new key, free of charge.

- **Duplicate key lending for trainees.** With this loan, the trainee can work on the same software as the other designers in the agency and can exchange projects with them.
- **Telephone customer service.** Telephone customer service is partnered with software updates to respond to user questions and troubleshoot at any moment. For greater efficiency of the service, a remote position may be proposed.
- **Immediate availability of new features.** New features are delivered as soon as they are ready, eliminating the need to wait for the annual software update.

### SERVICE PACK SUMMARY:

- 36-month contract
- Latest software version ArchiTECH.PC® or KutchCAD® offered
- All software updates for 3 years
- Telephone customer service for 3 years
- Loaner key (*dongle*) for your trainee
- Insurance for loss or theft of your key (*dongle*)
